Enduvo Honored with Prestigious Chicago Innovation Award

Award recognizes Enduvo's unique ability to make immersive, interactive content easy and cost-effective for anyone to create, share and consume

October 21, 2020 – Chicago, IL – [Enduvo](#), the company that makes interactive, immersive content easy for anyone to create, share and consume, today announced it has been named the winner of the [Theron Technology-Enabled Award at the annual Chicago Innovation Awards](#). This award recognizes Enduvo's unique ability to enable rapid, cost-effective creation and delivery of immersive content, with its no-code augmented and virtual reality (AR/VR) content authoring and delivery platform.

“The pandemic is pushing people to find more effective virtual ways to learn, communicate and collaborate. Even though immersive content is the best way to do this, it has been much too costly, time-consuming and complex for most organizations,” said Steve Garrou, Chairman and CEO of Enduvo. “We’re thrilled that the Chicago Innovation Awards recognizes Enduvo’s platform for revolutionizing the way organizations create and deliver affordable, high-impact collaboration and training programs.”

“In this year of a global pandemic, innovation is needed now more than ever,” said Tom Kuczumski, co-founder with Chicago journalist Dan Miller of the Chicago Innovation Awards. “2020 winners are solving big problems in healthcare, community and workforce development, education, electronics, manufacturing, and more.”

Enduvo enables anyone, regardless of technical know-how, to quickly create and instantaneously distribute content to people anywhere. People view the content on tablets, computers, and AR/VR devices. [Military](#), [healthcare](#), and education organizations, such as the [US Air Force](#), National Institutes of Health, and [University of Illinois College of Medicine](#), use Enduvo to significantly reduce content creation costs and deliver training, collaboration, and instructional content much faster. Enduvo's customers train Airmen to be mission-ready, collaborate with researchers on opposite sides of the world to find cures for deadly diseases, prepare medical students to be more successful practitioners, and create content to effectively teach students remotely.

About Chicago Innovation Awards

The Chicago Innovation Awards, celebrating its 19th year, is the Chicago region's foremost recognition of the most innovative new products or services brought to market each year. 272 organizations were nominated for this year's awards. As a group, these nominees are responsible for generating over \$5.6 billion in new revenues, 7,322 new jobs and 1,683 patents from their nominated new products and services.

About Enduvo

Enduvo empowers everyone to create and share meaningful experiences that enrich people's lives. Our powerfully simple, immersive content platform gives people a much better way to communicate, collaborate and share knowledge. Enduvo lets anyone rapidly create, distribute and consume rich, interactive, virtual experiences. Military, government, healthcare, industrial and education organizations use Enduvo to reduce development costs, speed delivery time and boost the impact of their content.
