

USE ENDUVO TO REALIZE BETTER TRAINING OUTCOMES, FASTER

We make it easy to quickly create, share and experience powerful immersive training wherever you are. Our no-code, AR/VR content authoring and delivery platform turns any subject matter expert into a masterful experiential trainer. Pilots, medics, maintainers, scientists and others can access training from anywhere in the world to learn better and achieve more, faster.

ADVANTAGES

Easy-to-Use

- Create and edit high-impact immersive training quickly, then deliver it instantly
- Produce training once and share on virtual reality headsets, laptops and tablets
- Manage user accounts and assess learner progress through a single cloud dashboard
- Curate inspiring, engaging training libraries and share anywhere instruction is needed

Efficient and Effective

- Train faster: lectures that previously took 1 hour are typically experienced in 15 minutes
- Learn better: interact with 2D assets, manipulate and explore 3D models
- Retain more: build confidence with on-demand, distraction-free experiential learning
- Save significantly: reduce training delivery time by 75% and development costs by 70%

Modernize Faster

- Align instruction to competencies rather than timetables
- Deliver consistent training across skill levels, job classifications, and locations
- Maximize existing investments in high-end computers and virtual reality headsets
- Eliminate the need to re-engage procurement for additional budget to refresh training
- Adapt instruction to provide a virtual “one-on-one” experience

Proven Performance

- USAF SBIR I, II, III and CSO award winners
- I/ITSEC 2019 Launch Pad presenter
- 2019 TAP Accelerator Participant
- More than 10 USAF squadrons across Cannon AFB, Joint Base San Antonio, Robins AFB, Travis AFB and Wright-Patterson AFB have deployed Enduvo to train medics, maintainers, pilots, firefighters, contract personnel, and more
- Scientists at NIH/NIAD are using Enduvo for biomedical collaboration of disease prevention and to share knowledge and train across multiple geographies, including Uganda and Mali
