

UX DESIGNER

Position Summary:

The right candidate will have the creativity, experience, and vision to put Enduvo's user at the center of the design process, making every interaction with the Enduvo platform easy, intuitive and beautiful.

As Enduvo's User Experience and User Interface Designer, you will envision how various user sets interact with our platform, create user flows and wireframes, and build clickable prototypes. You will cross-functionally and collaborate with Business Stakeholders, Product Managers, Customers, Developers and Enduvo's Content Production team. This position requires advocacy for the user, translating their needs, behaviors, feedback, and insights into an innovative, inspired XR platform that they love to use. The ideal candidate will be familiar with UX/UI trends in mixed reality and cloud-based platforms.

The position will report to the Chief Experience Officer.

Responsibilities:

- Responsible for UX/UI design across Enduvo's digital footprint from concept to launch: website, immersive mixed reality (VR/AR) application for PC and Mac, tablet/mobile (iOS, Android), etc.
- Focus on visual design, branding, functional/feature design, controls and content consumption
- Become an Enduvo platform Subject Matter Expert
- Leverage understanding of users' functional needs, wants and intuition to create an easy, delightful experience in which users are successful and want to repeat
- Collaborate with Customer Experience team to ascertain and analyze user results, and translate them into design requirements
- Create user journey flows, wireframes, storyboards, sitemaps, screen flows and visual design
- Iterate designs to deliver a stellar user experience
- Create clickable product prototypes
- Present designs and prototypes to stakeholders; collaborate and adjust accordingly
- Collaborate with Product Manager and Development team to clarify design questions or modify designs based on technical feasibility
- Structure and conduct usability testing to assess the quality of a user experience
- As a new in-house function for Enduvo, contribute ideas and recommendations to define, implement and continuously improve user experience design processes

Experience, Skills and Competencies:

- 5+ years of UX/Visual design experience
- Bachelor's degree in Design or equivalent experience
- Portfolio demonstrating multiple projects that reflect your conceptual, UX and visual designs
- Proven ability to translate requirements and distill complex processes into beautiful and intuitive designs
- Demonstrated improvement of user experience in past work
- Experience designing for enterprise applications, SaaS platforms, VR/XR products; PC/Mac, Android/iOS ,WebVR)
- Experience working cross-functionally with Business Stakeholders, Product Managers, Customers, Developers, Content Team through the design process
- Expertise with design tools such as Miro, Figma and Sketch
- Experience with prototyping tools such as InVision
- Experience with 3D tools - Blender, Unity
- Self-directed and motivated with excellent ability to collaborate
- Excellent business communication, organizational and project management skills
- Exceptional attention to detail
- Demonstrated commitment and passion for user-centric design
- Proactive, energetic attitude and desire to work in a results-oriented and deadline-driven environment
- Must be detailed in documenting information and practice good follow through techniques
- Demonstrates basic problem-solving abilities, coupled with a desire to take on responsibility

Details and Company Benefits:

- Permanent position
- Location: Remote, or Chicago-based
- Unlimited PTO pending manager approval
- 7 paid holidays
- Medical, dental and vision benefits
- Participation in employee option grant program

Enduvo is a powerfully simple, immersive, content authoring and delivery platform for training healthcare, mechanical, and technical industries. We remove the complexity, inflexibility, and high cost associated with creating VR/AR content. Experts easily produce learning experiences allowing learners to master topics in one-on-one real-world like 3D immersive environments. With Enduvo, experts and learners are more engaged, retain more information, and are better prepared for the work they do. If you're looking to work with a team who is passionate about empowering everyone to create and share meaningful experiences that enrich people's lives, send an email with your resume to work@enduvo.com.
