

User Experience and Interface (UX/UI) Designer

About us

- Enduvo is an intuitive and immersive content authoring and distribution platform that improves the speed, comprehension, and application of information to enable greater understanding and faster growth.
- Every day, we transform the world through a fearless pursuit of what's possible. We defy convention and are powering a movement against mediocrity. We enable thought leaders and their beneficiaries to thrive together.
- Enduvo is an immersive medium creating the possibility for complete transformation of those who tap into its potential. It's where opportunity and growth are available to anyone with the aptitude and ambition to make an impact.
- Our no-code, intuitive AR/VR content authoring and delivery platform rapidly transforms all subject matter experts into masterful, experiential instructors.
- We allow anyone to quickly create, share, and experience powerful immersive training, anywhere. Interactive, immersive content is instantly shared and accessed anytime, anywhere in VR headsets or on PCs, laptops, or tablets.

We work with the main industries: Military, Health, Industrial, and Education. Some important clients are the US Airforce, Boeing, The NIH (National Institute of Health), and OSF Healthcare

Your position at Enduvo:

- The right candidate will have the creativity, experience, and vision to put Enduvo's users at the center of the design process, making every interaction with the Enduvo platform easy, intuitive, and beautiful.
- As Enduvo's User Experience and User Interface Designer, you will envision how various user sets interact with our platform, create user flows and wireframes, and build clickable prototypes. You will work cross-functionally and collaborate with Business Stakeholders, Product Managers, Customers, Developers, and Enduvo's Content Production team. This position requires advocacy for the user, translating their needs, behaviors, feedback, and insights into an innovative, inspired XR platform that they love to use. The ideal candidate will be familiar with UX/UI trends in mixed reality and cloud-based platforms.
- This position will report to the Chief Experience Officer.

Your contribution:

- Responsible for UX/UI design across Enduvo's digital footprint from concept to launch: website, immersive mixed reality (VR/AR) application for PC and Mac, tablet/mobile (iOS, Android), etc.
- Focus on visual design, branding, functional/feature design, controls, and content consumption
- Become an Enduvo platform Subject Matter Expert
- Leverage understanding of users' functional needs, wants and intuition to create an easy, delightful experience in which users are successful and want to repeat
- Collaborate with the Customer Experience team to ascertain and analyze user results, and translate them into design requirements
- Create user journey flows, wireframes, storyboards, sitemaps, screen flows, and visual design
- Integrate designs to deliver a stellar user experience
- Create clickable product prototypes
- Present designs and prototypes to stakeholders; collaborate and adjust accordingly
- Collaborate with Product Manager and Development team to clarify design questions or modify designs based on technical feasibility
- Structure and conduct usability testing to assess the quality of a user experience
- As a new in-house function for Enduvo, contribute ideas and recommendations to define, implement and continuously improve user experience design processes

What you'll bring to our team:

- 5+ years of UX/Visual design experience
- Bachelor's degree in Design or equivalent experience

- Portfolio demonstrating multiple projects that reflect your conceptual, UX, and visual designs
- Proven ability to translate requirements and distill complex processes into beautiful and intuitive designs
- Demonstrated improvement of user experience in past work
- Experience designing for enterprise applications, SaaS platforms, VR/XR products; PC/Mac, Android/iOS, WebVR)
- Experience working cross-functionally with Business Stakeholders, Product Managers, Customers, Developers, and Content Team through the design process
- Expertise with design tools such as Miro, Figma, and Sketch
- Experience with prototyping tools such as InVision
- Experience with 3D tools - Blender, Unity
- Self-directed and motivated with excellent ability to collaborate
- Excellent business communication, organizational and project management skills
- Exceptional attention to detail
- Demonstrated commitment and passion for user-centric design
- Proactive, energetic attitude and desire to work in a results-oriented and deadline-driven environment
- Must be detailed in documenting information and practice good follow-through techniques
- Demonstrates basic problem-solving abilities, coupled with a desire to take on responsibility
- Experience with API & REST API integrations for large-scale social platforms
- Solid experience in design, development, and implementation of highly scalable, high-volume software systems and components, and distributed client-facing web applications
- Familiarity with Agile software development methodologies and project tracking tools such as Jira with an understanding of Git, Gitflow, and Git version control
- Location: Chicago preferred, but open to other locations
