Technical Program Manager

About us

Enduvo is an immersive content creation platform that gives creators the power to transform their learning environments and help their viewers learn faster, improve comprehension, and retain knowledge longer through experiential learning.

Intuitive. Immersive. Transformative.

We work with the Military, Health Care, Industrial, and Education industries.

Some of the companies and organizations we work with are US Air Force, NIH, OSF Healthcare, University of Illinois College of Medicine, Boeing, and Judge.

We help to create a better world while using the metaverse and top-notch technologies to achieve it and would love to have you join us for the ride!

Position Summary

You will be responsible for ensuring the successful execution of our development projects by bridging the gap between our development teams and other stakeholders. You will have a significant impact on our product development, helping us create exceptional immersive experiences and improving our software development processes.

You are the ideal candidate if you desire to get things done and you're persistent, articulate, and intentional. You are a strong communicator and know how to motivate a team around a product. You are comfortable with ambiguity and able to organize and simplify complex problems without sacrificing quality. You are driven and excited to be part of a very ambitious company.

You take ownership of:

- Product Sensibility: Exhibit a strong sense of product direction and user experience to guide development efforts effectively.
- Priority Decision-Making: Make critical priority decisions and are not hesitant to seek help and advice when necessary.
- Ownership: You take ownership of the product/feature and can effectively defend the choices made in prioritization or solution selection.

- Process Improvement: Identify areas for process enhancement and create efficient workflows to improve our development cycle.
- Release Management: Streamline and oversee the release process, ensuring timely delivery and meeting deadlines.
- Roadmap Development: Establish and maintain product roadmaps, defining end-to-end features to be developed.
- Detailed Execution: Ensure meticulous execution, identify, and resolve roadblocks, and work towards meeting deadlines.
- Data-Driven Insights: Gather data for future reference and generate valuable reports.
- Agile Expertise: Reinforce Agile practices, including sprint planning, retrospectives, and weekly stand-up meetings.
- Tool Proficiency: Utilize tools such as Jira, Confluence, and Monday.com for project management and team collaboration.
- Developer-Designer Liaison: Act as a bridge between developers and designers to ensure the final product aligns with design standards and quality expectations.
- Varied Experience: Your wealth of experience from both startup and large corporate environments allows you to adapt to our evolving needs (a plus).
- Immersive Technology Awareness: Demonstrating a foundational understanding of AR/VR technologies and their potential applications is a plus!

Who we're looking for:

- Experience: 3-6 years of experience in a similar role, demonstrating a track record of successful project management and process improvement.
- Agile Experience: Proficiency in Agile methodologies, including sprint planning, retrospectives, and weekly stand-up meetings.
- Start-up and Corporate Exposure: Mixed experience working in both startup and large corporate environments is preferred.
- Tool Proficiency: Familiarity with project management tools such as Jira, Confluence, and Monday.com.
- Product Sense: A keen sense of product direction and user experience.
- Process Improvement: Proven ability to optimize and enhance development processes.
- Communication Skills: Excellent communication and interpersonal skills to collaborate effectively with cross-functional teams.
- AR/VR Knowledge: Basic understanding of AR/VR technologies and their application in development is a plus.
